IN THE CLAIMS:

Please amend claims 1 and 5 as follows:

--1. (Amended) An information retrieval apparatus for retrieving information from a data base which [has] contains registration data including position data, image data and designation information for [specification of individual information in a mutually corresponding relationship] retrieval of additional information comprising:

a¹ [fetching]imaging means for [fetching] obtaining an image;

[position]location detection means for detecting a current position location of said information retrieval apparatus; and

selection means for selecting [from within the] image data from said data base which corresponds to the image obtained by said imaging means, said image data having [the] position data [regarding] representing positions [around] in the
